

## ***Bicycle Project Highlights: On-Road***

### ***Dare County***

### ***Manns Harbor to Manteo: US 64/264, Virginia Dare Memorial Bridge, Bicycle Accommodations TIP Project R-2551***

North Carolina's longest highway bridge (5.2 miles long) was opened in 2002. Some notable features of the new bridge, which spans the Roanoke Sound, are the wide offsets between the travel lanes and concrete parapets, the 54-inch rails and a unique "bicycle overlook" at the highest point along the structure. These bicycle safety accommodations make riding from the mainland to Roanoke Island a special experience for avid cyclists

This new 5.2 mile bridge was built to accommodate bicycles with wide shoulders and bicycle safe railings
